SUBJECT: Report on Small Caliber Ranges in New York and  
New England

The enclosed interim report on the capabilities of small caliber weapons training ranges located in New York and the New England states was prepared by the Defense Training and Performance Data Center. This report provides a comprehensive listing of ranges, locations, sizes, and known restrictions for DoD-owned (to include National Guard) ranges for the seven-state area. Both indoor and outdoor active ranges are included in the report.

All seven Reserve components are required to fulfill some type of annual weapons qualification. This collection effort can be of benefit to all units in the identified area. Since training hours are always at a premium, this report will be distributed to all units in the seven-state area to assist trainers in the selection of the closest ranges available for weapons qualification.

The military's ground, air, and sea training spaces are a national asset which must be protected. The travel time saved for Reserve units and general cost benefits derived from this pilot effort merits a continuing collection program. As additional data are assembled on other regions of the United States, follow-on reports will be distributed.

Recognizing that improvements are being made to our range facilities on a continuing basis, any comments, additions, or revisions to the data in this report should be addressed to

SMALL CALIBER RANGE DIRECTORY  
(Active Use Only)

NEW YORK AND NEW ENGLAND STATES

I. INTRODUCTION

This report responds to an Office of the Assistant Secretary of Defense (Reserve Affairs) request for an inventory of the capabilities of active use small caliber ranges located in New York and the New England states. The report is an abbreviated version of an initial report developed for OASD(RA) in March 1986. This report is published to assist small caliber range users in determining inventory and capabilities in their geographical areas.

The information in this report is derived from a prototype range data base being assembled at the Defense Training and Performance Data Center (TPDC). The data base contains information on the location, point of contact, size, and known restrictions for Department of Defense owned ranges including the National Guard, for the seven state area. Both indoor and outdoor ranges are included in the database. The information contained in this report provides an inventory of present active and limited use facilities. It does not address the capability of a range to achieve specific training tasks, such as Service qualification standards. Ranges which are currently inactive, deactivated, under construction or modernization, or are limited in their use due to Occupational Safety and Health Administration (Department of Labor) restrictions are not included in this document. Such ranges are contained in the master data base and were published in the previous full report. Questions related to ranges in these other categories may be referred to the Defense Training Data and Analysis Center. The complete list of data elements currently captured in the data base is contained in Section II of this report. The data base currently contains weapons range data obtained from the regular and reserve components of the four Services including the Army and Air National Guards.

The data base currently does not contain information on privately owned ranges that are available for use or lease to the military. Data on these private installations as well as data on Canadian facilities bordering on the New England states, which are used by some of the National Guard units for training, are possible expansions to the prototype data base. Future report editions are planned for additional geographical areas.

## II. DATA BASE DESCRIPTION

A. ELEMENTS. The data elements contained in the data base are listed below. They are divided into two major groupings: installation data, or that data describing the basic installation on which the range is located; and range data, that data describing individual ranges on or belonging to an installation.

### Installation Data

Installation name	Nearest urban area
Major user/component owner	Major command
Point of contact address/ location	Congressional district
	Latitude & Longitude

### Range Data

Primary use category	Alternate use categories
Weapons authorized	Ordinance/Ammunition authorized
Firing points/lanes	Utilities

Weapons/Ordnance/Ammunition  
restrictions or caveats

Facility status

Environmental restrictions

Indoor/outdoor facility

Community restrictions

Type of training facility

Range limitations/range  
denials

B. DEFINITION OF TERMS. Across Services, many different terms are used to describe ranges and training areas. In consolidation of data from all available sources, the following terms have been used in the development of a data dictionary. This glossary is furnished to permit ready translation among Services for the current data base.

#### Dictionary of Terms

##### Installations Data Element Descriptions:

ADDRESS/LOCATION: The actual location or address of an installation if not contained in the point of contact data set.

CONGRESSIONAL DISTRICT: The congressional district in which the installation is located.

INSTALLATION NAME: Name of the installation, base, post, or facility the range is located on or associated with.

LATITUDE: Geographical latitude of the installation or facility.

LONGITUDE: Geographical longitude of the installation or facility.

COMMAND: The major command having cognizance over the installation, e.g., TRADOC, FORSCOM, FIRST Army, LANTFLT, TAC, SAC, etc.

MAJOR USER/COMPONENT OWNER: The major user or owner Service component. Categories are: Army, Navy, USMC, USAF, USCG, Army National Guard, Air National Guard, Army Reserve, Naval Reserve, AF Reserve, USMC Reserve, USCG Reserve, DOD, Federal non-DOD, State agency, municipal agency, private, foreign.

NEAREST URBAN AREA: Name of the nearest urban city or town to the installation. Not used if the installation is located within the city limits of the address identifier.

POINT OF CONTACT: A set of data elements which may include any or all of the following: name or title, organization, address, telephone numbers (commercial and/or AUTOVON). This point of contact is used for further details concerning ranges located at a particular installation. Point of contact may or may not be co-located with the installation in question.

#### Ranges Data Element Descriptions:

ALTERNATE USE CATEGORIES: Alternate uses of a particular range, where applicable. For example, a rifle qualification range may also be applicable for use as a pistol qualification range, or as a shotgun range. A maximum of four alternate uses are currently available in the data base.

COMMUNITY RESTRICTIONS: Conditions related to the use of a range due to local community conditions or situations which may apply. Proximity to residential areas, firing times restrictions are available.

ENVIRONMENTAL RESTRICTIONS: Conditions related to the use of a range due to environmental conditions or situations which may apply. Non-availability during various seasons, approval of other agencies, restrictions relating to wildlife or ecological factors are contained herein.

FACILITY STATUS: The current status of the facility. The current conditions which are included in the data base are: Active, Limited Use, Limited Use due to OSHA restrictions, Deactivated, Inactive, or Under construction/modernization.

FIRING POINTS/LANES: The number of firing points, lanes, or positions, where applicable, at the range.

INDOOR or OUTDOOR FACILITY: an indication as to whether the facility is an indoor or outdoor facility.

ORDNANCE/AMMUNITION AUTHORIZED: Ordnance or ammunition which may be used on the range. Caveats concerning this ordnance or ammunition are contained in the weapons restrictions. Up to four categories of ammunition may be contained in this data element set, e.g., 5.56mm, 66mm LAW, 22mm sub-caliber mortar, TOW, etc.

PRIMARY USE CATEGORY: The primary use of a particular range, e.g., basic 25 meter firing/zeroing range, rifle qualification range, known distance range, mortar range, etc.

RANGE NAME/NUMBER: The range name or number used by the installation. If no number or name is assigned, a number is given to the range for sorting purposes.

RANGE USE LIMITATIONS/RANGE DENIALS: Limitations or denials to other ranges due to use of the range.

TYPE OF TRAINING FACILITY: Each range is currently classified into one of the the following categories: Firing Range, Non-firing Range (including maneuver/exercise areas), or Training Facility (other than a firing range or maneuver area).

UTILITIES: The availability of latrines/heads, running water, and electrical utilities. Comments concerning these utilities are contained in the environmental restrictions data element.

WEAPONS AUTHORIZED: Weapons which may be used on the range. Caveats concerning these weapons are contained in the weapons restrictions. Up to four categories of weapons may be contained in this data element set, e.g., pistol, M-16, M-60 LMG, M203 grenade launcher, mortar, etc.

WEAPONS/ORDNANCE/AMMUNITION RESTRICTIONS OR CAVEATS: Any weapons, ordnance, or ammunition restrictions or caveats applicable to the use of a range.

### III. OVERVIEW

Three tables are presented to summarize the data presented in detail in the following sections. These and other displays shown in this report are provided only as examples to illustrate capabilities of the data base to answer queries from training managers at all levels. Table 1 provides a simple overview or summary of the total number of installations, the number of those installations having active or limited use ranges, and the number of active or limited use small caliber ranges surveyed for the seven states. This data is sorted by state.

Table 2 displays the number of installations and respective ranges by state and is sorted by the installation's major user/owner Service component. Table 3 lists, by state, the type of ranges (small caliber weapon use categories of pistol, .22 caliber rifle, M-16/5.56mm rifle, and M-60/.62mm light machinegun) with their respective total number of firing points.

Table 1

#### IV. DIRECTORY OF SMALL ARMS RANGES BY STATE

The small caliber ranges are listed at Tab A by state and by weapons type. The listings are broken down first for weapons type (pistol, .22 caliber rifle, M-16/5.56mm rifle, and M-60/7.62mm machinegun) within each state. For each range, the following data are displayed:

- Installation/Range name
- Facility status
- Number of firing points, lanes, or positions
- Environmental restrictions flag (Yes or No)
- Community restrictions flag (Yes or No)
- Point of contact telephone number

Text concerning environmental or community restrictions, as applicable, is contained in the appropriate data element sets. The Yes or No shown in Format 1 indicates that there is text in that element set. Reference to the comparable entry at Tab B will be necessary to ascertain the actual text contained therein.

The current facility status, as known, is shown. The categories are Active and Limited use. Reference to the comparable entry at Tab B will be necessary to ascertain the text indicating the reason for the limited use. Ranges which are currently inactive, deactivated, under construction or modernization, or are limited in their use due to Occupational Safety and Health Administration (Department of Labor) restrictions are not included in this document.

Other displays are also possible. In fact, the data can be formatted using any of the fields, or partial fields, of the data elements as identified in section II, Data Base Description. Data sorts are only constrained by the number of data elements and categorical values contained within those data elements.

The number or name following each installation name is the range name or number used by the installation or an assigned number to differentiate between multiple ranges on the same installation.

## V. RANGES (ACTIVE USE)

The range data displayed in the previous section was arranged by weapons type. Tab B presents a complete list of active and limited use small caliber ranges arranged alphabetically by the installation name within each state. A number of the ranges listed in this section are designated for alternate categories of use. The data element sets presented are:

- Installation name
- Point of contact
- Major user/owner
- Major command

- Range name/number
- Firing points/lanes/positions
- Primary and alternate uses
- Weapons authorized
- Ordnance/ammunition authorized
- Facility status
- Indoor or outdoor facility
- Weapons restrictions/range denials
- Environmental or community restrictions

## VI. INSTALLATION SURVEY

Tab C is a list of all installations surveyed for this data base. The list is grouped alphabetically by state. The Range column indicates whether or not the installation has any active or limited use small caliber ranges (Yes or No). A "Yes" in this column indicates that there is at least one active or limited use range at that installation.

While every attempt was made to obtain a complete picture of the small caliber range capabilities at the time of this project, it is recognized that some facilities may have been overlooked, new ranges are being constructed and existing facilities are being converted to other usage or configuration. Readers of the report are encouraged to contact the Defense Training and Performance Data Center with additions or corrections to this report.

The Collective and Joint Training Division point of contact may be reached at commercial telephone (305) 281-3623. "Tear-out" sheets have been provided at the back of the document for comments concerning the document or to request additional copies or distribution.
